VICTORY 1405

HIGH-QUALITY ERGONOMIC SEATING

Office chair **VICTORY**

Originality. Ease. Elegance. Freshness.

VI 1405.082

Rim[®]

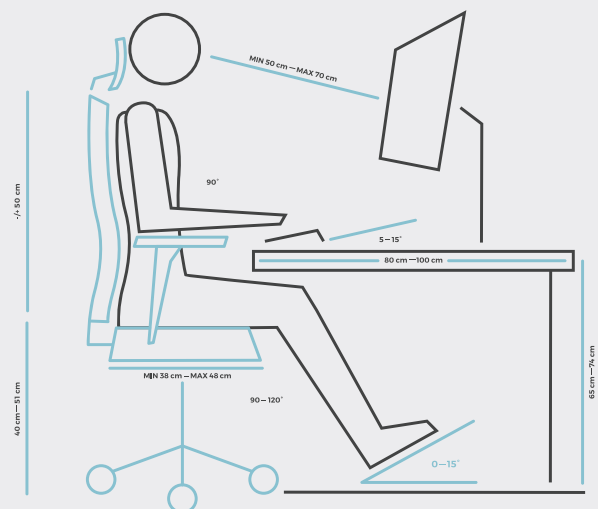

- Backrest upholstered with breathable mesh RIB 431 (black)
- Seat upholstered with fabric Phoenix 599 (black)

- 1. BACKREST**
High backrest with height-adjustable lumbar support.
- 2. SEAT**
Ergonomically designed with seat-depth adjustment.
- 3. ARMRESTS**
Height-adjustable.
- 4. MECHANISM ST2**
For height-adjustment and adjustment of the backrest counter pressure with 4 locking positions.
- 5. BASE/CASTORS**
Plastic base, castors for hard and soft floors.

WHAT MAKES A HIGH-QUALITY ERGONOMIC CHAIR DIFFERENT?

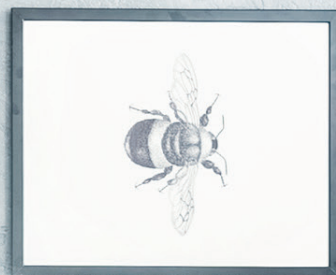

- **HEADREST**
The headrest is used to relax the muscles surrounding the cervical spine.
- **BACKREST+LUMBAR SUPPORT ADJUSTMENT**
Correct adjustment of the lumbar support supports the most bending part of your spine and thus it gets into the natural double S-shaped curve. Prevents slouching.
- **ARMRESTS**
Correctly adjusted armrests help relax muscles surrounding the cervical spine, shoulders, and upper back. What is important is to prevent tension when working in a rigid position.
- **SEAT**
The front edge with sufficient rounding to prevent the compression of vessels and helps blood circulation to the limbs. For correct sitting it is necessary to use the entire area of seat.
- **MECHANISM**
Synchronous mechanism allows to adjust seat and backrest at the correct angle and support dynamic seating.
